- FAA Acquisition Baseline Management Standard Operating Procedure
 - Section 4.7, 4.11, 6.1, 7.0, and Appendices A and C: In order to ensure consistency of terminology, changes were made to the description of the Management Standard Operating Procedure to be consistent with CPRs.

URL of page where doc is linked
footer date should be

- Implementation Strategy and Planning Document
 - Section 9.1: Edit terminology for consistency.

Summary of Change: The CPRs change request corrects inconsistencies in the definition and use of what was previously known as key performance parameters (KPPs) in AMS policy and guidance.

Reason for Change: CPRs provides decision authorities with insight into a programs progress towards its end state. CPR status information identifies program risks and issues, providing opportunities to make informed adjustments. They also inform the decision authority about a solution's operational acceptability

Development, Review, and Concurrence: AEB Verification and Validation Working Group

Target Audience: Investment Decision Authorities, Investment Analysis Teams, Program Managers.

Potential Links in FAST for the Change: N/A

Attachments: redline and final attachments

Briefing Planned: Yes.

ASAG Responsibilities: Review and comment
