T3.2.2 - Source Selection Revised 7/2020

A Source Selection Revised 9/2020

Source selection is a phase of the acquisition process applicable to the acquisition of products, services, construction, and real property. Source selection establishes how a contractor or vendor will be selected, either competitively or through a single source acquisition. For more information on single source acquisitions, see AMS Guidance T3.2.2.4.

For competitive source selection methods, the FAA utilizes various methods for obtaining products, services, construction, and real property. The first method is described under AMS T3.2.2.3 Complex Source Selection and is used for complex, large dollar, developmental, noncommercial items, services, or complex real property acquisitions. The second method is described under T3.2.2.5 Commercial and Simplified Purchases and, is typically used for commercial items or real property acquisitions that are less complex, smaller in dollar value, and shorter term.
